### Services:

Gold Cyber Security  
Package & ISO27001

CaseStudy

### Cognism's Challenge:

To be ISO27001 Certified.

### Cognism's Background:

Cognism is a sales acceleration platform, using patented AI technology, to provide B2B sales teams with a blend of real-time company, people and event data to streamline prospecting, find and deliver new revenue.

### Why Did Cognism's Choose DigitalXRAID?

We required ISO27001 but didn't have the internal capacity to implement and manage it. DigitalXRAID's managed service was perfect for us. It allowed us to concentrate on other matters while DigitalXRAID can work to ensure that we are always compliant.

### DigitalXRAID's Solution

DigitalXRAID identified the pain points Cognism faced and our cyber security packages were a perfect fit. With the continuous vulnerability assessments it made it easier for Cognism to manage their Cyber Security. Cognism also needed support with their ISO27001 compliance which our service was a perfect fit for. With the services they have received they receive regular communication and are always aware of their current Cyber Security Posture.

“

*“DigitalXRAID have made our lives considerably easier with this managed ISO27001 service. Although we are always conscious about our information security, implementing ISO27001 was a big task that was going to be difficult not only to implement but maintain. DigitalXRAID have taken this pain point and resolved it.”*
