

Cyber Security Firm of the Year – Northern England & Recognised Leader in Penetrating Testing 2017

DigitalXRAID is a Doncaster based global provider of Security Services, We spoke to CO-Founders Rick Jones and Scott Goodwin as we look for further insight into what makes the company such a success.

DigitalXRAID is a UK based cyber security company, started in 2015 by IT Security specialists Scott Goodwin and Rick Jones. The company provides a variety of services which aim to help organisations deal with the ever-changing cyber security landscape. Rick describes how Digital XRAID has improved its service to meet the rising expectations of clients.

"During our first 18 months of trading, we have increased our service offerings to accommodate the evolving needs of our customers, identified during our engagements. Currently, our fully qualified testing team deliver an assortment of services, including internal and external penetration testing, as well as web application and mobile application penetration testing. We are proud to have launched our Security Operations Centre, providing UK based security experts to help companies gain

answers to the most pressing information security questions, how security is my organisation, and is my organisation under active attack.

Related to its mission, Scott lists the overall mission of the firm, and what steps the team and staff take to ensure that they reach their goals, making the company successful.

"Here at DigitalXRAID, our mission is to provide world class cyber security services, whilst simplifying what is often seen as a complex and costly service. We consistently receive positive feedback; most of our customers go on to buy further services from us."

Staff at the firm are a key part of the company's success, something Rick allude to. They are constantly training, ensuring they develop and adapt along with the industry.

"As a cyber security business, we could not compete or operate

without our competent and fully trained staff. Currently, the qualifications and accreditations we hold include; CCIE Security, CISSP, CHECK, CREST, OSCP, OSCE, IASME, ISO27001 Assessor. Keeping these up to date allow us to work for all areas of central and local government, and in the banking and finance industries, which have particularly stringent standards for cyber security service provision."

Looking ahead, Scott tells us about an upcoming product which surely secure the future of DigitalXRAID, as it looks to cement itself as a leader in the market within the Cybersecurity industry.

"Ultimately, DigitalXRAID have developed a new product to be used in automated production lines and are interested in how we can create innovative solutions to combat the threats posed by malicious manipulation of the Internet of Things."
