What is **Cyber Essentials**?

Cyber Essentials is a government endorsed certification designed to shield your organisation from cyber-attacks, keep your business secure online and safeguard your digital assets.

A Cyber Essentials certification demonstrates to clients, shareholders and key personnel that you take the threat of cybercrime seriously and you recognise the importance of putting strategies in place to prevent sensitive information falling into the wrong hands.

Why Do I Need **Cyber Essentials**?

With cyber crime on the rise and businesses increasingly vulnerable to hackers, it's more important than ever to protect yourself from the threat of cyberattacks. Failure to implement appropriate systems and controls could have disastrous effects for your business, exposing your clients to identity theft and causing irreparable damage to the integrity of your brand.

- Cyber Essentials will protect you against the majority of online threats, safeguarding your digital assets, shielding you from cyber-attacks and giving you the peace of mind that your business is safe and secure.
- Cyber Essentials is a government-approved accreditation, and without it, your company will be unable to bid for government tenders. So, if you're looking to win government contracts, Cyber Essentials is an absolute must.

“

DigitalXRAID had the experience to understand the pain points within Cyber Security. From helping us learn and understand the importance of cyber security to helping us know what needs to be done in the future.

”

Why Should I Choose DigitalXRAID for My Cyber Essentials Certification?

DigitalXRAID is committed to providing cutting-edge cyber security solutions for businesses everywhere, and, put simply, we're the experts in our field. We've helped certify and secure over a thousand different companies, and we can do the same for you.

- Our highly trained experts will guide you through the process step by step, to get your accreditation quickly.
- We'll oversee the entire assessment process from start to finish, ensuring you meet all the requirements necessary to pass your Cyber Essentials Certification.
- With our intelligent, tailored approach we'll make sure you have everything you need to achieve your certification, providing support and advice throughout the whole process.
- With our 'Pass Guarantee' promise we provide re-sits free of charge, so in the unlikely event that fail to achieve your Cyber Essentials Certificate at the first attempt you won't incur any extra costs.

In need of a **Cyber Essentials** certification?

to see how we can help you.

“

Rather than selling to us, they were educating us and letting us make our own mind up. They helped us achieve our Cyber Essentials Plus Certification very quickly and easily.

”

Hifz Shaikh - IT Security Compliance Manager

FIVE KEY CONTROLS

Cyber Essentials is made up of five key controls. By implementing these five key controls, you can protect your sensitive data, demonstrate to clients and stakeholders that you take the threat of cyber crime seriously and ensure you meet all the necessary government-approved cyber security standards.

Malware Protection

Cyber Essentials looks at the measures you are taking to protect all computers connected to the internet. It also looks at the processes in place to identify and remove malware.

Secure Configuration

We are going to look at whether or not you are applying the correct security controls when installing computers and other network devices to reduce cyber threats.

Patch Management

New patches and versions of applications are released regularly, often due to security issues identified. The Cyber Essentials Certification looks at how you are keeping your software updated with all the latest security features to eradicate any weak spots in your systems.

Boundary Firewalls & Internet Gateways

We will identify whether you are using appropriate countermeasures against unwanted traffic getting access to your network. This includes default passwords and how your firewalls / gateways are configured.

Access Management

Due to the number of users often on a network it is key to ensure that all users have the correct privileges on their workstations according to their role and responsibilities within the organisation.

OUR CYBER ESSENTIALS PACKAGES

Here, at DigitalXRAID, we understand that no two companies are the same. We offer a range of options to suit every organisation, from start-ups and SMEs to blue-chip companies and multinationals.

Basic Package

Cyber Essentials Basic

Perfect for organisations that require little or no support

- Limited support
- Pass or fail option
- Retest fee applies

Pass First Time

Cyber Essentials Basic - Pass First Time

Receive full support throughout the certification process

- Unlimited phone support
- Unlimited email support
- No retest fees

Flexible Payments

Cyber Essentials Basic Pass First Time - Flexible Payment Plan

Full support and a quarterly vulnerability scan included
(24 month minimum term)

- Monthly direct debit
- Unlimited phone support
- Unlimited email support
- No retest fees

Cyber Essentials Plus

Cyber Essentials Plus follows the same principles as the Cyber Essentials basic, with the added requirement of a technical verification. As with Cyber Essentials Basic, we use the self-assessment questionnaire alongside an external vulnerability scan to test your systems and check for any weak spots. However, Cyber Essentials Plus takes this one step further, targeting your organisation's internal network facing infrastructure and workstations, in order to highlight any issues that were not picked up by the vulnerability scan. Cyber Essentials Plus gives you the added peace of mind that your current software meets all the minimum security requirements.

- Comprehensive solution
- Technical verification
- Unlimited phone support
- Unlimited email support
- Pass within 48 hours

- Limited Support
- Pass or Fail Options
- Retest Fee Applies

- Cyber Essentials Plus Pass First Time
- Unlimited Phone Support
- Unlimited Email Support
- No Retest Fee

Expert Knowledge
