journey

# What is a **Cybersecurity Maturity Assessment?**

A **Cybersecurity Maturity Assessment** evaluates your organisation's operational resilience and cyber security procedures aligned to the **National Institute of Standards and Technology (NIST) Framework (CSF) v2.0**.

This provides you with a comprehensive risk assessment of your organisation's readiness to prevent, detect, contain and respond to cyber threats. The service provides a baseline of your current cyber maturity and risk level in conjunction with recommended steps to reduce risk.

## The **NIST Framework**

The **NIST Cybersecurity Framework (CSF) 2.0** is a cyber security maturity model which assesses cybersecurity readiness.

The **NIST Cybersecurity Framework (CSF) 2.0** comprises six key domains: Govern, Identify, Protect, Detect, Respond, and Recover. Cybersecurity Maturity Assessment solutions are conducted against these domains using 23 categories and 108 subcategories. This Framework will help you to identify and address any gaps in your security posture before a hacker can exploit them.

# Benefits of DigitalXRAID's Cybersecurity Maturity Assessment

DigitalXRAID's fully managed Cybersecurity Maturity Assessment service evaluates your organisation's operational resilience and cyber security procedures - so you can manage vulnerabilities, close security gaps and reduce risk quickly.

With a Cybersecurity Maturity Assessment, you can confidently navigate through digital transformation projects and business growth with a clearly defined roadmap.

We will look beyond technical control resilience and adopt a holistic approach across your people, processes and technology. Resilience indicators in the Cybersecurity Maturity Assessment report will highlight any areas to be addressed, with guidelines for improvement that delivers a future cyber security roadmap.

By focusing on risk reduction and increased cyber maturity, you will provide your business with a coherent cyber security strategy aligned to strategic business goals.

“The DigitalXRAID team were fantastic throughout the project and very process driven. They really probed into all areas of our technology, risk and controls, which is exactly what we needed. The whole experience was very enjoyable because the approach from DigitalXRAID was so open and honest but also well integrated with the entire business. It's a breath of fresh air to get positive feedback from the different departments.”

# KEY COMPONENTS OF THE CYBERSECURITY MATURITY ASSESSMENT SERVICE

What can you expect from your Cybersecurity Maturity Assessment service?

## STEP ONE >

### Gap Analysis

Our experts will analyse your current security posture to assess your cybersecurity readiness and ability to respond to cyberattacks, also known as incident response. Our experts will deep dive across all areas of people, process and technology.

## STEP TWO >

### NIST Cybersecurity Framework (CSF) 2.0 Maturity Assessment

We'll work with you to understand how your current controls and policies align with the six key domains, comprising of 23 categories and 108 subcategories. Our experts will conduct a detailed review of policy documentation and operational procedures.

## STEP THREE >

### Cybersecurity Maturity Assessment Report

You will receive a detailed Cyber Security Maturity Assessment report with guidance on where you need to implement controls and measures to address any gaps in your current security posture. DigitalXRAID experts will work with you to produce a clear and prioritised cyber maturity plan and deliver a cyber transformation roadmap and timeline.

## STEP FOUR >

### Monitor progress and posture

As part of the managed service, we will work with you as your cyber security maturity improves. With the changes to your security posture, and as your business grows, changes to security controls may be required. DigitalXRAID will partner with you to ensure your business remains protected.

## Expertise

DigitalXRAID has a unique insight into the 3 pillars of cybersecurity: Offensive, Defensive and Compliance. We offer the best protection against cyberthreats.

## Partnership

Our experts will work as an extension of your team, offering expertise so your business is truly protected against threats as well as compliant with industry standards.

## Guidance

DigitalXRAID are completely impartial, we will offer you in-depth advice based on your needs rather than looking to push a particular software solution.

## DigitalXRAID – Your Best Defence Against Cyber and Information Security Threats

We understand that no two companies are the same. DigitalXRAID will work as an extension of your own team to identify where your organisation is vulnerable to and where you need to take action to avoid the threat of a cyberattack and data loss.

We'll establish how you meet cyber threats and what incident response capabilities you have in place. Finally, we'll help you to prioritise your cyber security roadmap and related investments according to your greatest areas of risk and potential impact.

“The DigitalXRAID team have been really helpful every step of the way. They fully understood our unique business drivers and aims. They took time to understand exactly what was already in place and formalise existing processes, rather than reinvent them, which was appreciated across the business.”

# Proud to be Highly Certified as Cyber Experts

At DigitalXRAID, we specialise in providing cutting-edge, market-leading cyber security solutions. We're experts in our field, and our skills and experience are backed up by our extensive awards and certifications. We're serious about security and compliance and have some of the finest security professionals in the country.

## Our Highly Skilled Team

The DigitalXRAID Team are qualified to the best possible industry standards, and they're fully certified, accredited and security-checked.

Here are just a few of our employees' credentials:

- ✔ CREST Certified Tester
- ✔ Cyber Scheme Team Members
- ✔ CHECK Team Leader
- ✔ Offensive Security Certified Professional
- ✔ Cisco Certified Internetworking Expert (CCIE Security)
- ✔ Certified Information Systems Security Professional (CISSP)
- ✔ CREST Practitioner Security Analyst
- ✔ CREST Practitioner Intrusion Analyst
- ✔ ISO 27001 Lead Implementer & Lead Auditor
