# What sets us apart?

DigitalXRAID is an award-winning cyber security service provider. Using a combination of people, expert knowledge and technology we stay one step ahead of the criminals. We are not one size fits all, we work with our clients to understand their needs and provide a fully tailored service to ensure complete protection.

Our mission is to deliver exceptional customer service and leave our customers better educated, more secure and less exposed to cyber attacks. Our business and our team are accredited to the highest standards in the industry. We sit in the top 1% of cyber security providers globally for our accreditations.

We're proud to be one of only a handful of business in the world to hold this prestigious CREST Accredited for our 24/7/365 Security Operations Centre. We are also ISO-27001, ISO-20000, ISO-9001 & Cyber Essentials Plus certified and an IASME Certification Body.

## CREST Certification Explained

At the heart of DigitalXRAID's excellence in cybersecurity services lies our prestigious CREST certification. But what does this mean for our clients?

CREST is a globally recognised accreditation for the cybersecurity industry, signifying the highest standards of ethical conduct, robust methodologies, and technical expertise. Being CREST certified means that DigitalXRAID has undergone rigorous assessments and demonstrated compliance with stringent standards that cover all aspects of our operations, from our technical capabilities to our business processes.

For our clients, this certification provides peace of mind. It assures them of the quality, reliability, and integrity of the services we provide. Whether it's through our 24/7 Security Operations Centre (SOC) Service, Vulnerability Assessment Service, advanced penetration testing services, or our Cyber Security Incident Response service, being in the top 1% of providers globally means we bring unparalleled expertise and security assurance to your cybersecurity needs.

# Our Services

DigitalXRAID offer services across all three pillars of cyber security; Offensive, Defensive and Compliance. Our customers are able to get a full spectrum holistic view of their security and risk.

## Offensive

Penetration Testing & Vulnerability Scanning:

- Web & Mobile Apps
- Infrastructure
- VPN
- PCI DSS

Network/Device Security Configuration Review:

- Firewall
- Server
- Switch/Router
- Workstation
- CIS Benchmarking

Cloud Security Review:

- AWS
- Azure
- Google
- Office 365

IT Health Check  
(PSN/DFE/CHECK/DSP)

Red Team Exercises  
Social Engineering  
Managed Phishing Service

## Defensive

CREST Accredited Security Operations Centre:

- 24/7/365 monitoring
- XDR Extended Threat Detection & Response
- SIEM & Log Management
- Intrusion Detection System
- Intrusion Prevention System
- Threat Mining
- Endpoint Detection & Response
- Dark Web Monitoring
- File Integrity Monitoring
- Data Collection & Security Analysis
- Continuous Vulnerability Monitoring
- Orchestration & Automation
- Reporting

NCSC & CREST Accredited Incident Response

## Compliance

ISO 27001 & 9001 Managed Service & Consultancy:

- Step 1: Gap Analysis
- Step 2: Implementation
- Step 3: Stage 1 Audit
- Step 4: Stage 2 Audit
- Step 5: Management & Maintenance

Cybersecurity Maturity Assessment

Compliance Framework Consultancy:

- NIST
- SOC2
- PCI-DSS

# DigitalXRAID's Security Operations Centre (SOC) Service

Through our 24/7 Security Operations Centre, we deliver leading cyber security strategies to organisations that enhance the security posture and reduce the risk, cost and reputational damage of a breach.

## Protected and Secured Every Day of the Year

Powered by best-in-class tooling, DigitalXRAID's Managed SOC service is designed to deliver robust security while optimising costs, ensuring maximum ROI through improved security posture, reduced incident impacts, and enhanced operational efficiency.

The SOC includes a combination of machine learning (ML) capabilities and generative AI models to validate and investigate security alerts quickly and efficiently.

**Security  
Operations Centre**

## We are certified members of CREST

To become a CREST certified Security Operations Centre (SOC), the service provider must undergo a thorough assessment process that evaluates their technical capabilities, processes, and procedures. The assessment is carried out by CREST-accredited assessors who are experts in the field of cybersecurity.

“ We are immediately made aware of any security threats and know they are being investigated by DigitalXRAID, eliminating the risk of lasting damage to our business. ”

Compliant With:

## Expert Knowledge

Our cyber security experts are some of the best in the business. We'll safeguard your digital assets and shield you from every conceivable online threat.

## The Personal Touch

Here at DigitalXRAID, we understand that no two companies are the same. With our dedicated, fully tailored service, we'll provide you with the best possible cyber security programme for your business. Our goal is to be an extension of your team.

## 24 Hour Protection

Cyber criminals don't sleep, so neither do we. Our Security Operations Centre provides round-the-clock protection 24 hours-a-day, 365 days-a-year.

## Peace of Mind

When you choose DigitalXRAID, you're choosing the best. With our dedicated, industry-leading SOC service, you'll have the peace of mind that your digital assets are in the safest possible hands.

## The Hive: Threat Intelligence

DigitalXRAID's CTI specialists are fed data from the entire internet, every day, to map out adversaries and their infrastructure. This gives them greater visibility into the hidden sites where cybercriminals instigate their attacks and enhances proactive threat protection.

## Flexibility & Customer First

All the development of your SOC, including use cases and tuning, becomes your intellectual property. We do not hold customers to ransom or compel them to stay with us due to the complexity of leaving.

## Staying Two Steps Ahead of the Hackers

Cyber criminals are always looking for new and inventive ways to bypass your security. Using state-of-the-art, up-to-the-minute security techniques, we'll identify potential threats and prevent security breaches before they happen.

# Protect Your Business From Threats 24/7

## Cyber Security Incident Response Service

DigitalXRAID's Incident Response Service is essential for businesses seeking to safeguard their operational digital assets around the clock. The service ensures your business is prepared to respond effectively and efficiently to any cybersecurity threat.

### Benefits of DigitalXRAID's Incident Response Service:

- **24/7 Protection:** Cyber threats don't adhere to a 9-5 schedule, and neither do we. Our SOC team provides round-the-clock surveillance and response, ensuring your business is protected at all times.
- **Expert Team:** Our analysts are not only highly skilled but also hold prestigious accreditations, guaranteeing you're in safe hands. They leverage the latest technologies and methodologies to identify and counteract threats before they escalate.
- **Tailored Solutions:** Understanding that no two businesses are the same, we offer customised incident response plans that align with your specific needs and risk profile, ensuring optimal protection.
- **Minimised Downtime:** Swift and effective response limits operational disruptions, ensuring your business continues to run smoothly even in the face of cyber threats.
- **Cost Reduction:** By preventing or quickly mitigating cyberattacks, our service helps avoid the steep costs associated with data breaches, including fines, legal fees, and reputational damage.
- **Peace of Mind:** Knowing that your cybersecurity is in the hands of experts allows you to focus on what you do best – running your business.

**DigitalXRAID is a CIR Level 2 Assured Service  
Provider, awarded by CREST & NCSC**

**DigitalXRAID**  
will prepare  
you for  
attack

**TABLE-TOP  
EXERCISES**

# Cyber Incident Response Exercises

DigitalXRAID's Cyber Incident Exercising Service is your ultimate cyber defence drill, meticulously simulating real-world cyber threats to fortify your organisation's response capabilities.

Through Cyber Incident roundtable exercises we provide a controlled environment where your team can test, refine, and validate your incident response strategies, ensuring you are always a step ahead of cyber adversaries.

It's not just about responding to incidents; it's about mastering them before they happen.

- **Enhanced Preparedness:**

Experience and practice incident response using simulated incident response scenarios before facing a real cyberattack.

- **Role Clarity and Team Cohesion:**

Conduct a comprehensive roundtable exercise to ensure every team member understands their role and how to effectively collaborate during an incident.

- **Minimised Harm, Maximised Resilience:**

Rapid and effective response minimises potential damage, bolstering your organisation's cyber resilience.

## Fully Managed Table-Top & Live Play Exercises

Experience real-time cyberattack simulations designed to challenge and strengthen your team's response capabilities.

## Customised Scenarios

Choose from a variety of potential attack scenarios, tailored to both business and technical aspects of your organisation.

## Bespoke Technical Attack Simulations

Our experts will craft detailed narratives to simulate a mature cyberattack, ensuring your team faces realistic challenges.

## Expert Guidance and Support

DigitalXRAID's seasoned professionals chair the sessions, offering invaluable advice and providing necessary collateral for effective exercise execution.

## Incident Response Plan Review

As scenarios unfold, we review and refine your current Incident Response Plan in line with industry best practices.

## Post-Exercise Insights

Receive a comprehensive report and session recording, detailing findings and recommended remediation strategies.

# PENETRATION TESTING

Secure  
Your  
Systems &  
Services

Identify  
Security  
Gaps

Stop Security  
Breaches  
Before They  
Happen

## Identify Weaknesses & Vulnerabilities

**Our comprehensive penetration testing uses ethical hacking techniques to target systems in an attempt to gain physical access.**

This type of penetration testing allows us to test the security risks associated to your networks, systems and web applications, diagnosing the flaws in your security before they can be exploited.

Our offensive cybersecurity services, including advanced penetration testing, vulnerability assessments, and full Red Team exercises, are designed to simulate the tactics, techniques, and procedures (TTPs) used by cybercriminals. By identifying and exploiting vulnerabilities in your systems before the attackers do, we provide valuable insights into your security posture's strengths and weaknesses.

Our security cleared, CREST and CHECK-certified teams perform these assessments with precision according to gold standard industry methodologies, ensuring that you receive the actionable intelligence needed to bolster your defences.

**Take Action  
in a Timely  
Manner**

## Gain Control of Your Security

The OrbitalX security portal is a central hub providing better visibility for a more holistic view of security, so your business can be better protected from cyber criminals.

The portal will enable you to manage risk appropriately and communicate with senior management on risk levels and mitigation. Senior leaders get clear ROI visibility, and IT and security teams can better articulate the benefit of cyber security programs to senior management to aid in securing future funding.

The OrbitalX security portal exists to give you back the primary control to protect your business. By providing a holistic view of your cyber security universe, you are able to address gaps, report on the value of your security programmes and build a roadmap to complete protection.

**Get Full Visibility  
of Your  
Cyber Security**

**Prove The Value  
of Your Security  
Programs**

**Mitigate Risks  
in a Timely  
Manner**

# Get full visibility of your cyber security anywhere, anytime.

info@digitalxraid.com

## What Makes **OrbitalX** Different?

This security portal isn't just about penetration testing reporting or service tickets, it connects all three pillars of cyber security: Offensive, Defensive and Compliance, for a full spectrum view of security and risk.

- Address the gap between how issues and vulnerabilities are actioned and addressed in a timely manner
- Reporting on cyber security moves away from archaic pdfs and emails which can be easily missed, to a fully digital format
- User-friendly GUI for IT teams and senior stakeholders to get better visibility of their security universe without needing deep technical knowledge or duplicating work across multiple tools

# Government Approved Certification

## Cyber Essentials Certification

**Cyber Essentials is a government-backed accreditation designed to protect your business against damaging security attacks and sensitive data breaches.**

As an approved Certifying Body, we can provide your business with certification.

Cyber Essentials will protect you against the majority of online threats, safeguarding your digital assets, shielding you from cyber-attacks and giving you the peace of mind that your business is safe and secure. Our highly trained experts will guide you through the process step by step, to get your accreditation quickly.

We'll oversee the entire assessment process from start to finish, ensuring you meet all the requirements necessary to pass your Cyber Essentials Certification. With our 'Pass Guarantee' promise we provide re-sits free of charge, so in the unlikely event that fail to achieve your Cyber Essentials Certificate, you won't incur any extra costs.

**Pass First  
Time**

**80% Online Threat  
Reduction**

**Supply Chain  
Assurance**

**DigitalXRAID**  
will take the  
headache  
away

## **ISO 27001 FULLY MANAGED SERVICE**

# **Achieve and maintain ISO 27001 certification**

**DigitalXRAID will provide you with a fully managed ISO 27001 service, taking you step-by-step through the entire process through to certification.**

This includes an initial gap analysis and implementation, right up to the certification stage 2 audit. Not only that – once you've achieved your certification our highly trained experts will continue to provide support and advice, safeguarding your business and ensuring you remain compliant and exceed ISO 27001 requirements.

We're committed to providing cutting edge cyber security for organisations of all sizes. We're serious about security and have some of the finest security professionals in the country. We've helped to secure and protect thousands of companies – and we can do the same for your business.

[info@digitalxraid.com](mailto:info@digitalxraid.com)

# Closing The Gaps In Your Information Security

## Get Accredited

We'll guide you through the process step by step, from the initial review to your annual audits and maintenance, making sure you meet all the criteria necessary to achieve ISO 27001 certification.

## Be Compliant

With our in-depth GAP analysis, our expert team will assess your readiness, determine areas of weakness and recommend improvements to ensure the certification process runs smoothly and successfully.

## Achieve the Highest Standard

ISO 27001 is the highest standard of information security, demonstrating your commitment to safeguarding your business and your clients' data, distinguishing your company as an industry leader in information security protocols.

CYBER SECURITY EXPERTS

Joining forces with DigitalXRAID means partnering with a team that is dedicated to your security and success. As we move forward, you can expect a partnership that not only responds to the current threat landscape but also anticipates future challenges, ensuring your organisation is prepared and protected for whatever lies ahead.

With DigitalXRAID, you're not just getting a service provider; you're gaining a partner strategically committed to securing your digital future.

## What Makes us Different

“DigitalXRAID had the perfect level of technical expertise and account management to make our experience with them even better than expected.”

“DigitalXRAID had the experience to understand the pain points within Cyber Security. From helping us learn and understand the importance of cyber security to helping us know what needs to be done in the future.”

“Rather than selling to us, they were educating us and letting us make our own mind up. They helped us achieve our “ Cyber Essentials Plus Certification very quickly and easily.”

“We are immediately made aware of any security threats and know they are being investigated by DigitalXRAID, eliminating the risk of lasting damage to our business.”

“24/7 protection gives us the peace of mind that the business is safe even when we aren't at work!”

# Proud to be **Highly Certified** as **Cyber Experts**

At DigitalXRAID, we specialise in providing cutting-edge, market-leading cyber security solutions. We're experts in our field, and our skills and experience are backed up by our extensive awards and certifications. We're serious about security and compliance and have some of the finest security professionals in the country.

## Our **Highly Skilled Team**

The DigitalXRAID Team are qualified to the best possible industry standards, and they're fully certified, accredited and security-checked.

Here are just a few of our employees' credentials:

- ✔ CREST Certified Tester
- ✔ Cyber Scheme Team Members
- ✔ CHECK Team Leader
- ✔ Offensive Security Certified Professional
- ✔ Cisco Certified Internetworking Expert (CCIE Security)
- ✔ Certified Information Systems Security Professional (CISSP)
- ✔ CREST Practitioner Security Analyst
- ✔ CREST Practitioner Intrusion Analyst
- ✔ ISO 27001 Lead Implementer & Lead Auditor
