Business**

If there's a gap,
DigitalXRAID
can expose it

Social Engineering Testing & Awareness Training

Your People Are Your Front Line - Are They Ready?

Cyber criminals don't always hack your systems - they can also hack your people. Social engineering is the subtle, but highly effective tactic of tricking employees into handing over credentials, system access, or sensitive data.

Even with world-class technical defences, human error can still bring your business to a standstill. Cybercriminals play on trust, curiosity, and a desire to help - values that your team should be proud of. But without the right training and safeguards, these strengths can become vulnerabilities.

At DigitalXRAID, we'll help you expose the gaps, educate your team, and protect your business against real world social engineering attacks.

Why it Matters?

33%

of hacks involve
social engineering

91%

of attacks begin with
a phishing email

43%

of breaches
targeted SMEs

Our **Social Engineering** Services

We simulate targeted attacks to test and train your workforce - without putting your business at risk.

Expose

Our targeted campaigns simulate real-world hacking and social engineering techniques, such as phishing campaigns, to expose vulnerabilities in your security.

Educate

Our social engineering experts will provide the training your employees need to spot suspicious communications and malicious links.

Protect

Our industry leading experts can provide your workforce with the knowledge and tools to keep hackers at bay and to protect personal data.

Give Your Organisation The Cyber Resilience It Needs

What We Test

DigitalXRAID will design and execute custom social engineering campaigns that mimic real-world attack scenarios targeting your business.

Each scenario is crafted to your needs to test your specific policies and procedures and policy adherence, which can include:

Phishing & Spear Phishing

Emails posing as trusted sources

Credential Reset Requests

Fake support calls/emails requesting access

Executive Impersonation

Messages appearing to come from senior staff

Quid Pro Quo

Fake offers or prizes in exchange for sensitive data

Tailgating

Physical attempts to access secure areas

Pretexting

Carefully crafted stories to extract info or access

Baiting

Infected devices left onsite to lure curious employees
