EXERCISES**

Cyber Incident Response Exercises

DigitalXRAID's Cyber Incident Exercising Service is your ultimate cyber defence drill, meticulously simulating real-world cyber threats to fortify your organisation's response capabilities.

Through Cyber Incident roundtable exercises we provide a controlled environment where your team can test, refine, and validate your incident response strategies, ensuring you are always a step ahead of cyber adversaries.

It's not just about responding to incidents; it's about mastering them before they happen.

We understand that no two companies are the same. That's why we work as an extension of your team to understand the best potential attack scenarios for your business.

With bespoke attack simulations in place, we'll support you through the process, providing guidance and advice throughout the exercise execution. And our support doesn't stop there. Post-exercise we will work with you to refine your Incident Response Plan and detail recommendations for remediation of any issues.

Fully Managed Table-Top & Live Play Exercises

Experience real-time cyberattack simulations designed to challenge and strengthen your team's response capabilities.

Customised Scenarios

Choose from a variety of potential attack scenarios, tailored to both business and technical aspects of your organisation.

Bespoke Technical Attack Simulations

Our experts will craft detailed narratives to simulate a mature cyberattack, ensuring your team faces realistic challenges.

Expert Guidance and Support

DigitalXRAID's seasoned professionals chair the sessions, offering invaluable advice and providing necessary collateral for effective exercise execution.

Incident Response Plan Review

As scenarios unfold, we review and refine your current Incident Response Plan in line with industry best practices.

Post-Exercise Insights

Receive a comprehensive report and session recording, detailing findings and recommended remediation strategies.

Benefits of Cyber Incident Response Exercising

Enhanced Preparedness

Experience and practice incident response using simulated incident response scenarios before facing a real cyberattack.

Role Clarity and Team Cohesion

Conduct a comprehensive roundtable exercise to ensure every team member understands their role and how to effectively collaborate during an incident.

Minimised Harm, Maximised Resilience

Rapid and effective response minimises potential damage, bolstering your organisation's cyber resilience.
